DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14, 21-40, 47-66, and 73-140 drawn to a process and an apparatus of determining angular orientation of a golf club shaft using a vibration generator, classified in class 73, subclass 1.82.
 - II. Claims 15-20, 41-46, and 67-72 drawn to a process and an apparatus for measuring asymmetry of a golf club shaft using a force transducer, classified in class 73, subclass 854.
2. Inventions of a process and an apparatus of determining angular orientation of a golf club shaft using a vibration generator and a process and an apparatus for measuring asymmetry of a golf club shaft using a force transducer are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention a process and an apparatus of determining angular orientation of a golf club shaft using a vibration generator has separate utility such as determining the seam of a shaft without using a force transducer. Also the invention of a process and an apparatus for measuring asymmetry of a golf club shaft using a force

transducer has separate utility such as determining the shaft asymmetry without using a vibration generator. See MPEP § 806.05(d).

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was not made to request an oral election to the above restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steve Blau whose telephone number is (703) 308-2712.
